lowered, but only by a small amount.

- f. Planned 1954 production of the following Main Administrations was not decreased:
 - 1) Hauptverwaltung Augreestung fuer die Textil-und Polygraphische Industrie (Main Administration for Equipping of the Textile and Polygraphic Industries)
 - 2) Hamptverwaltung Automobil-und Traktorenbau (Main Administration for the Construction of Automobiles and Tractors)
 - 3) Main Administration General Magnetives and Railroad Cars)
 - 4) Main Administration for the Construction of Cables and Apparatus)
- g. Planned 1954 production of the enterprises under the remainder of the 17 Main Administrations in the Ministry for Machine Construction was decreased by small amounts.
- Together with the changes in the froduction Plan, long drawn-out negotiations between the Ministry and the State Planning Commission were held about changing the 1954 Finance Plan. It should be expected that, in accordance with the decrease of planned production, a decrease of planned profits would be ordered. The contrary, however, took place. The following are the most striking examples:
 - 1954 planned profit for all enterprises under the Main Administration for Construction of Cables and Apparatus was changed from 178 million DNE to 218 million DNE.
 - b. The Main Administration for Commstruction of Automobiles and Brackers, from 212 million DME to 235 million DME.
 - c. The Main Additistration for Machine Tool Construction, from

II Ì ÉGIB

Accordingly, prime costs were lowered to such a degree that higher profits could be obtained. However, no change was authorised with respect to the 1954 Manpower Flam, and the enterprises affected by the change were unable to release those workers who were made superfluous by the decrease in production. When the Finance Department of the Ministry for Machine Construction suggested to the State Planning Commission that the 1954 Manpower Plan should be reduced in the same proportion as production was to be decreased and profits were to be increased, the State Planning Commission rejected such a suggestion. The answer of the State Planning Commission to the Finance Department pointed out that the proposed change in the Hompower Plan would authorize the managements of the enterprises to release large numbers of workers, which, under all circumstances, should be avoided. Reduction
